

WHAT IS CLAIMED IS

Please amend claim 1- 4

Please rewrite claim 1-4 as follows :

1. A transparent small memory card to be set in an electric device,  
5 comprising :

A substrate having an upper surface and a lower surface, the upper surface formed with a plurality of connected points and a plurality of golden fingers electrically connected to the plurality of connected points, the substrate is used to set in the electric device, so that the golden fingers on the upper surface of the  
10 substrate may be electrically connected to the electric device;

At least one memory chip, ~~which~~ arranged on the upper surface of the substrate, and electrically connected to a plurality of connected points ~~on~~ of the upper surface; and

A transparent ~~glue~~ layer encapsulated the memory chip is used to protect the  
15 memory chip and display the mark of the memory chip or the substrate.

2. The transparent small memory card according to claim 1, wherein the memory chip is located on the lower surface of the substrate, the lower surface of the substrate arranged a memory chip, and the transparent glue layer is encapsulated the memory chip.

20 3. The transparent small memory card according to claim 1, wherein the

upper surface of the substrate is arranged two memory chips, and the transparent glue ~~layer~~ is encapsulated the two memory chips at the same time.

4. The transparent small memory card according to claim 1, wherein the memory chip is electrically connected to the connected points of the upper surface  
5 of the substrate by wires.
